Dear Mr. Stacey:

I am writing as a concerned citizen regarding the new streamflow regulations and wish to convey the following:

I SUPPORT the new regulations; they should not be weakened in any way. In this era of multiple assaults on the environment, the importance of protecting our water sources cannot be overstated. Class A, however, really must be eliminated since the draft lacks standards for preventing seriously degraded streams from dying. I cannot support this short-sighted, deeply flawed mode of thinking.

Thank you very much for reading my comments.

Yours truly,

Muriel Garvey
